24h

24-hour online
service for customers

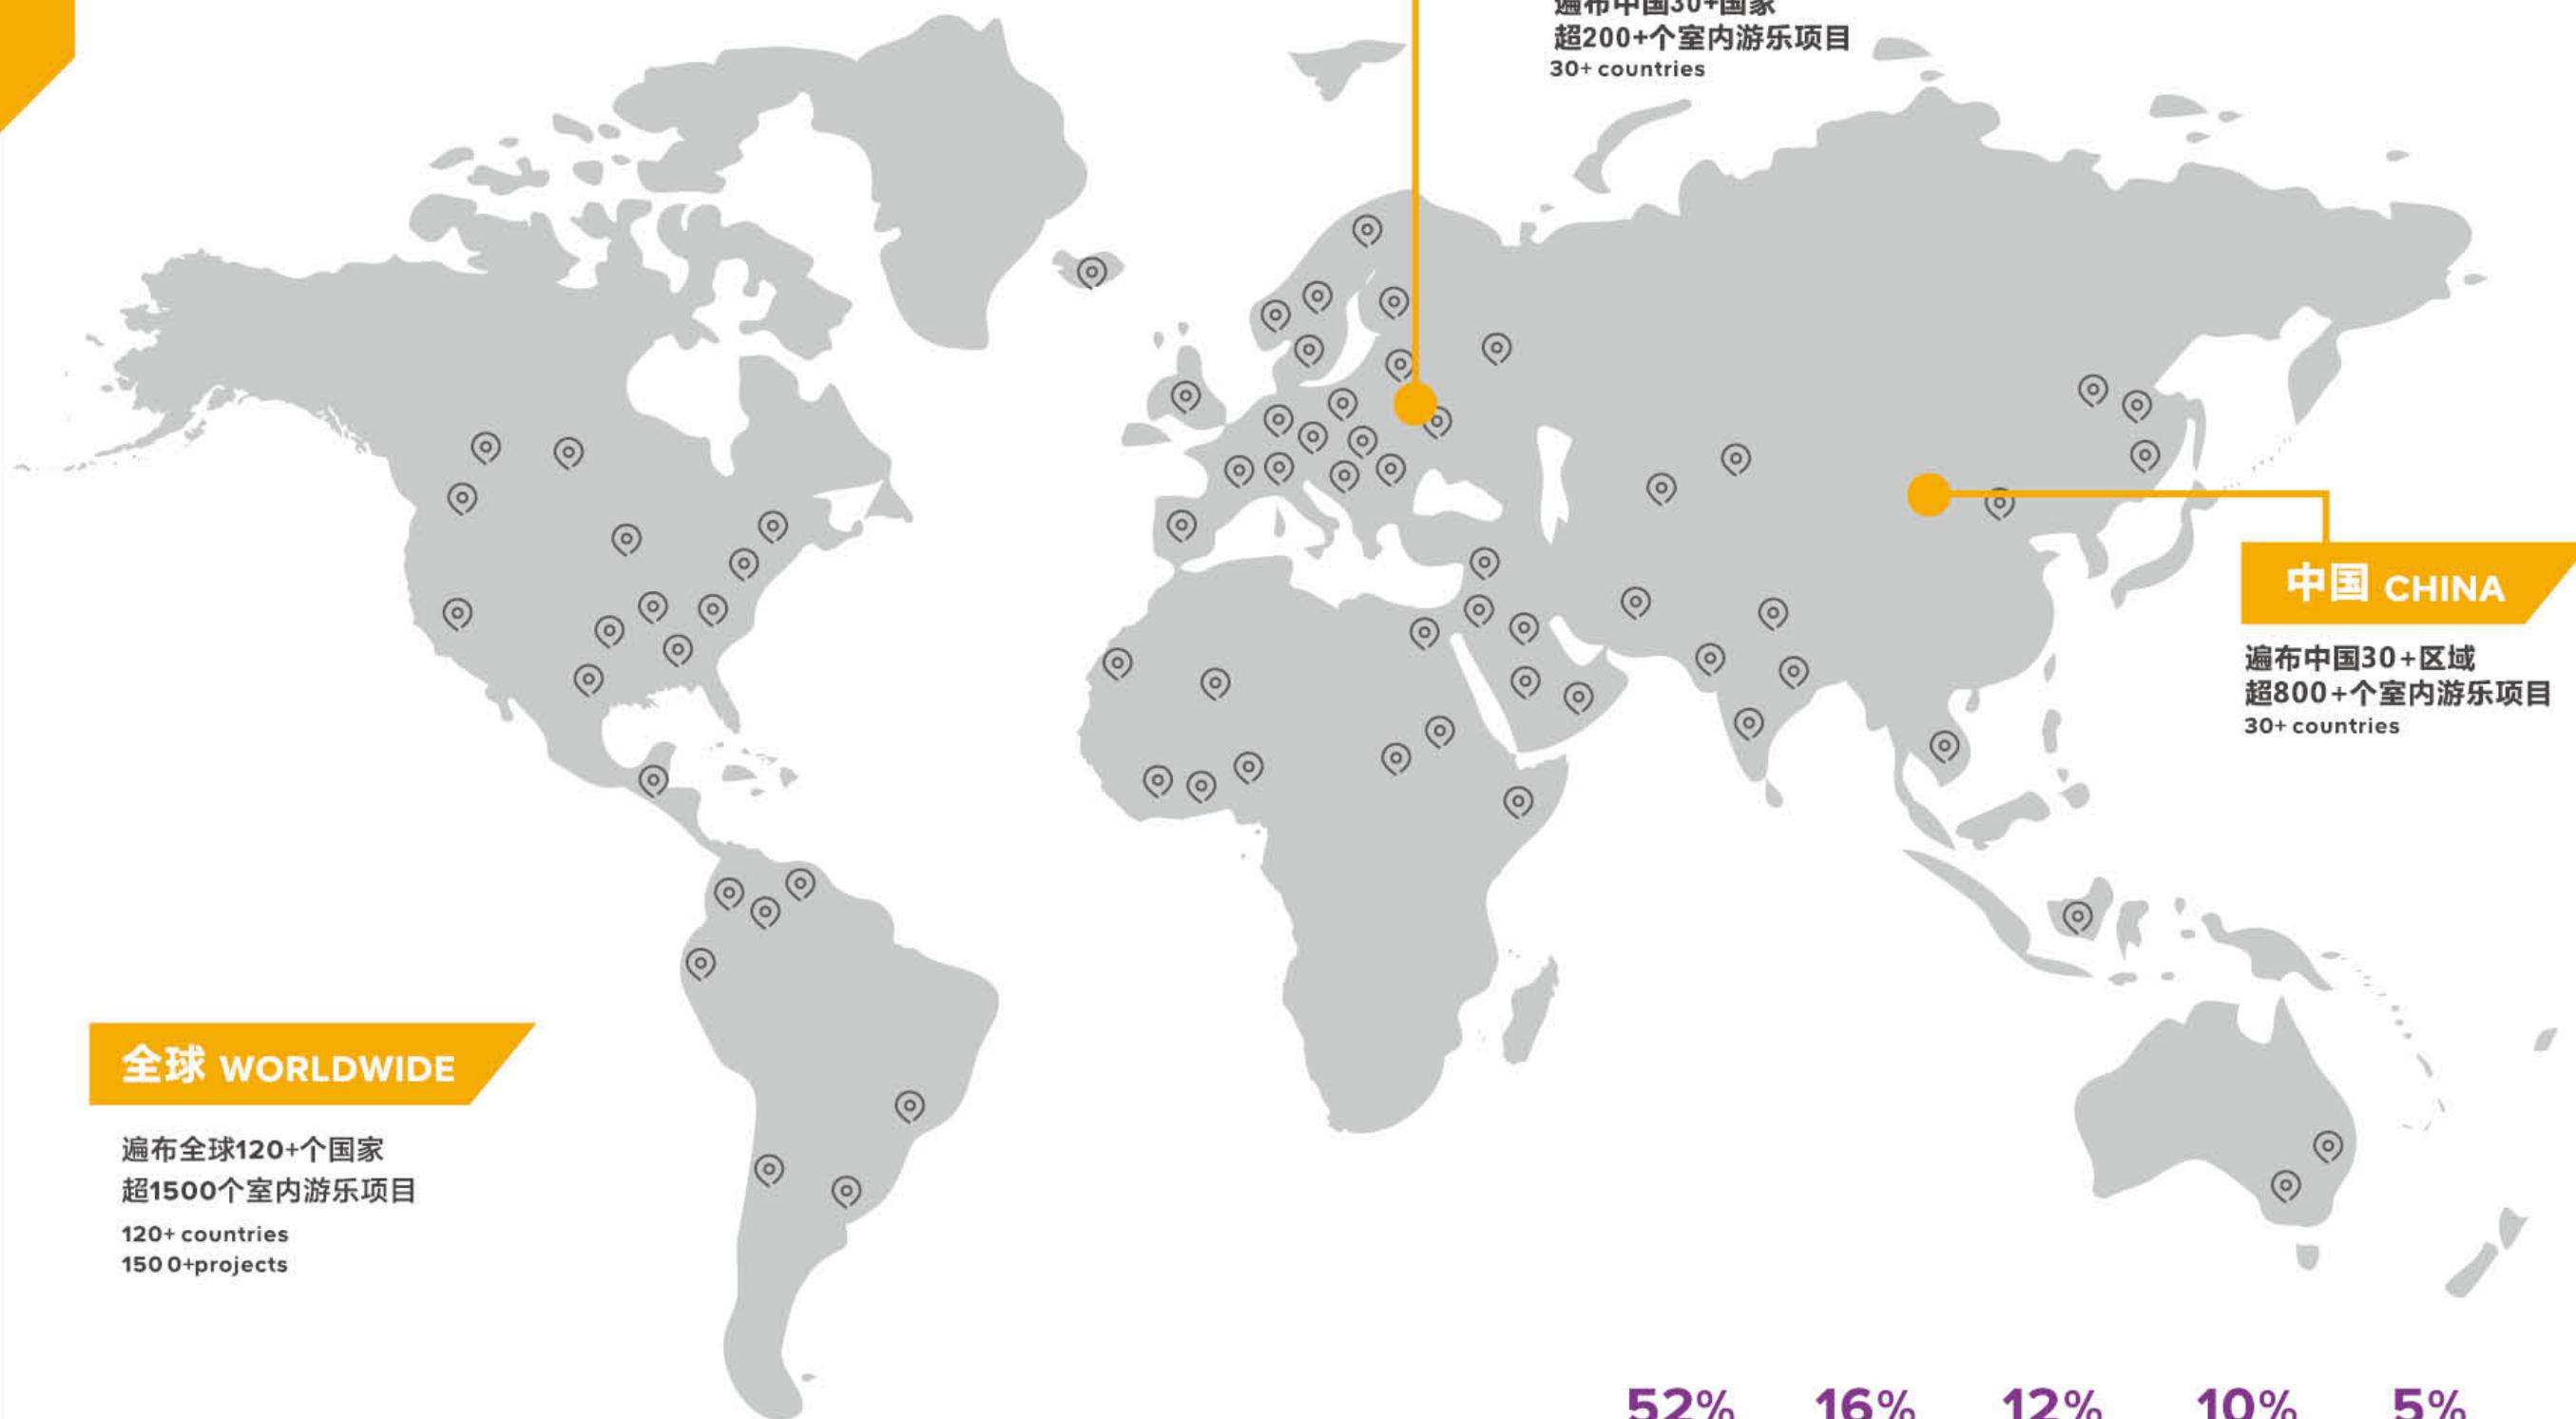

All facilities in this children's amusement park strictly adhere to safety standards. Core materials have passed authoritative tests by SGS and TUV, complying with the EN1176 safety standard for children's play equipment and ISO international quality system certification. From the soft wrapping layer of the indoor playground to the load-bearing parts of the climbing frame, food-grade environmental-friendly PE materials and high-elastic flame-retardant sponges are adopted, which are non-toxic, odorless, tear-resistant and wear-resistant, eliminating harmful substances such as formaldehyde and heavy metals. All edges are processed with a rounded corner grinding technique to effectively prevent collision injuries. Backed by multiple international certifications, we create a safe playing space for children, reassuring parents completely and truly achieving "joy without hidden dangers, and growth without worries".

*Plastic *metal *soft play *packaging

Our production workshop, with over 50 staffs , specialize in 4 main areas, (Plastic, metal,soft play and packaging.)We are committed to research and develop, produce and sell children's playground equipment all over the world, Our aim is to form a partnership with our clients and provide them with an efficient and professional "one stop" service.

F.A.Q.

Why choose Aoleao?

Aoleao is the Turnkey solution manufacturer and provider for all your playground and family entertainment center needs. We are experts in the 3D design, configuration, theming and installation of commercial grade indoor playgrounds for kids and adults. Our project managers will walk you through the process from design to installation and final delivery. We incorporate advanced technology while complying with the strictest global industry standards under EN, ASTM, and others, to deliver the safest and most exciting entertainment experiences. Our designs are versatile, compatible with any commercial applications, and suitable for all ages while being affordable. With our experience and expertise in this industry will ensure your success.

What safety standards does Aoleao meet?

Aoleao maintains a proactive and rigorous approach to ensure our equipment and play units meet and exceed all North American and European indoor playground systems standards, including TUV, SGS, ASTM, CPSIA, EN1176, and CE. As a result, we are fully qualified and prepared to analyze local requirements and standards to ensure your specific play system satisfies them in different regions and countries.

What kind of venue would needed?

We require a suitable open space for indoor playgrounds and trampoline parks to accommodate the size and complexity of your desired play system. However, depending on the location and available space, we can also plan and design for existing rooms and mezzanines to be integrated into a more expansive facility. In addition, a concrete slab floor will be necessary to build any play system. Having some natural lighting is always a plus.

Is it difficult to install? Do you have installation manual?

Or; do you send your own workers over to help install the Indoor Playground? What's the cost?

The installation manual will be sent after the indoor playground is produced completed. So you can do installation by our guidance. But if playground bigger than 150m², we strongly suggest let's our installer take care for you.

The installation cost will be stated clearly in our sales contract.

What to do if there is a quality problem of equipment?

During guarantee time, we will provide after-sales service. In addition, we will send additional news accessories for future use, and we will send new parts in the earliest time for your broken parts.

What maintenance does the equipment require?

Indoor playground sets require regular care and maintenance. Spills need immediate cleanup to protect other kids in the play area from slipping and falling. Health is also important to keep in mind when kids use playground equipment. Regularly cleaning indoor equipment with soap and water and sanitizing products can protect the health of kids who use it and promote a cleaner, longer-lasting play structure.

What will do, if the playground is not attractive after a long time?

Therefore, when choosing indoor play area equipment, investors will consider covering different age groups. Standing from children's sight, investors select popular and safe games. Without games to current business, investors can add some new games to attract children.

What warranties are available?

Aoleao Amusement has a one-year warranty that covers workmanship and product defects. Learn more about the specifics of the warranty by talking to our project managers.
